

HCFI

transformMED

Dear HCFI,

The recent floods in Pakistan claimed more than 1000 lives and affected about a third of the whole country.

One of the facilities affected was the Christian Hospital Tank in the Khyber Pakhtunkhwa Province of the country.

This hospital has functioned as a mission hospital for more than 150 years and is Directed by Dr Nadeem Hidayat, who is also the National Coordinator of HCF Pakistan. It is a 70 bed facility and receives around 40 000 patients a year.

The whole hospital was flooded during the recent rains and is in urgent need of repair and renovation. The HCFI Financial Action Team has decided to allocate an amount of \$3500 to the hospital and this will cover the repair costs to the chapel as well as some other areas of need.

However, this contribution from HCFI covers only a fraction of the total repair costs. If you would like to further contribute to this worthy cause, please use the "Support us and Donate now!" button below. Make sure to indicate that the donation is for Christian Hospital Tank.

We are trusting that the Lord will continue to use the hospital and its Christian staff to reach the community with His Gospel.

In Christ

Dr Keith Michael

International Coordinator
